Tekst oglasa:

Naslov: Textbook of Hypertension Autor(i): John Swales Izdavač: Wiley-Blackwell Godina: 1994 Povez: tvrd Strana:1328 Pismo: English Stanje knjige: odlično očuvana, nekorišćena Opis knjige: Hypertension is one of the most significant clinical problems facing the physician. It is also one of the most difficult to treat. This book provides the practicing general physician a coherent, well-structured and, above all, relevant account of the scientific basis and clinical management of hypertension. It is not simply a guide to prescribing drugs, nor is it an encyclopaedic guide to the primary literature. Instead, it presents a summary of the underlying pathophysiological mechanisms to provide the clinician with a rational basis for treatment, and goes on to describe the consequences of hypertension in terms of target organ damage, the various sub-groups, secondary hypertension, clinical assessment and investigation, treatment, new developments, national guidelines and standards, pharmacological and non-pharmacological therapies, operating on the hypertensive patient, hypertensive emergencies and social impact. Uplata se može izvršiti pouzećem, a može i pre slanja uplatom na račun u Telenor banci. Troškove slanja plaća kupac. Lično preuzimanje podrazumeva dolazak na mesto gde se dogovorimo (Beograd - uglavnom centar, Muzej Istorije Jugoslavije, tj. Hajd Parka, Autokomanda) u tom slučaju i plaćanje lično.
