Kategorija: Ostalo (Mašine i alati)

Lokacija: Beograd (Srbija)

Dodatne informacije:

Tekst oglasa:

Continuous structural monitoring is essential for safety and the prevention of structural damage. This high-precision professional sensor is designed to monitor movements, vibrations, and deformations in real time across bridges, dams, tunnels, railways, buildings, and other engineering structures. With a high sampling frequency of up to 100 Hz, the sensor enables the immediate detection of structural changes and automatic alarm activation whenever safety thresholds are exceeded. It is the ideal solution for infrastructure monitoring, construction projects, structural stability assessment, and advanced safety systems. □ Real-time monitoring □ High-precision measurements □ Sampling frequency up to 100 Hz □ Automatic alarms for movement and deformation detection □ Suitable for dams, bridges, tunnels, railways, and industrial facilities □ Seamless integration with professional monitoring systems □□ Contact us for more information and a customized quotation. #StructuralMonitoring #MonitoringSensor #Inclinometer #TiltSensor #BridgeMonitoring #DamMonitoring #TunnelMonitoring #RailwayMonitoring #GeotechnicalMonitoring #InfrastructureMonitoring #ConstructionMonitoring #DeformationMonitoring #RealTimeMonitoring #EngineeringSolutions #SurveyingEquipment #GeoMonitoring
