Kategorija: Ostalo (Računari)
Lokacija: Zrenjanin (Srbija, Zrenjanin)

Dodatne informacije:

Tekst oglasa:

Prodajem termalne paste odličnih performansi, viskoke provodljivosti i stabilnih na visokim temperaturama, kao i NOVE, nesečene silikonske termalne podloge (Thermal pad), plave boje... Pasta savršeno provodi toplotu na hladnjak, bez ulja je, netoksična je, bez ukusa, nekorozivna. . . i posle se lako skida sa površine gde je aplicirana. 1. Termalna Pasta Siva 1gr CENA: 200 dinara/komad MINIMALNA KOLIČINA ZA KUPOVINU ILI PORUDŽBINU: 2 KOMADA ! ! ! Fotografija: 2 Specifikacija: High Grade Stability And Reliability. Apply to CPU, VGA, Chipset, Radiator And Other PC Components. Helps Disperse The Heat From CPU To Heatsink Effectively. Low Thermal Resistance And High Conductivity For Superior Heat Transfer. High Temperature Resistance. Non-toxic, Tasteless, Non-corrosive. Thermal Conductivity: Greater than 1.93 W/m-K Thermal Resistance: Less than 0.225 Celsius -in Square/W Color: Grey Net Weight: 1gr 2. Termalna Pasta Siva 30gr CENA: 1000 dinara/komad Fotografija: 3 Specifikacija: High Grade Stability And Reliability. Apply to CPU, VGA, Chipset, Radiator And Other PC Components. Helps Disperse The Heat From CPU To Heatsink Effectively. Low Thermal Resistance And High Conductivity For Superior Heat Transfer. High Temperature Resistance. Non-toxic, Tasteless, Non-corrosive. Thermal Conductivity: Greater than 1.93W / MKThermal Resistance: <0.225 Operating Temperature Range: -30~280° Color: Grey Net Weight: 30g 3. Termalna Pasta Visoke provodljivosti 12.4 W/mK 4gr CENA: 1.500 dinara/komad Fotografije: 4, 5, 6, 7 i 8. Kvalitetna termalna pasta visoke provodljivosti 12.4 W/mK, namenjena za snažno odvođenje toplote sa procesora, grafičkih čipova i drugih elektronskih komponenti... Specifikacija: 1. Ultra-High Thermal Conductivity Dalibull thermal paste delivers an industry-leading thermal conductivity of up to 12.4W/m·K, creating an ultra-efficient heat transfer path between your CPU/GPU and heatsink. It rapidly dissipates excess heat, lowers component temperatures by 10-20℃, and ensures stable, long-lasting performance even under heavy gaming,

rendering, or overclocking loads. 2. Extremely Low Thermal Impedance With a thermal impedance as low as 0.04℃·in²/W, our thermal grease eliminates air gaps between electronic components and cooling systems, minimizing thermal resistance to the maximum extent. This ensures 100% efficient heat dissipation, prevents overheating throttling, and extends the service life of your valuable devices. 3. Wide Operating Temperature Range Engineered for extreme environments, Dalibull thermal paste works stably across a wide temperature range from -50℃ to 200℃. Whether you're using it in cold outdoor equipment, high-power industrial devices, or high-performance gaming PCs, it maintains consistent viscosity and performance without drying out, cracking, or oil seepage. 4. Premium Grey Formula & Easy Application Our high-purity grey thermal compound is non-corrosive, non-conductive, and electrically insulated, 100% safe for all electronic components. The included applicator spatula ensures precise, mess-free application, making it perfect for both DIY enthusiasts and professional technicians. It's compatible with all CPU/GPU models, laptops, PS5, Xbox, and other gaming consoles. Zahvaljujem Vam se na ukazanom poverenju, vremenu i pažnji.
